

My special guest today is Dr. Chichi Menakaya. She is a medical surgeon based in London, England, but she is also a fashion designer. She is the founder and creator of Okwuis Frocentric, a fashion line that produces luxurious pieces and accessories for Men and Women. Her designs portray the uniqueness and affluence of African culture by integrating with global issues, with a main focus on supporting and providing empowerment to survivors of Domestic Violence, globally.

Thanks for listening 😊
